

RIDECCELL

The Intelligent Platform for Premium Ridesharing Services

Ridecell offers the best way to launch a premium ridesharing service. Our configurable platform enables your service to attract and retain customers, operate efficiently and scale seamlessly.

Built for the most demanding use case: yours.

- **Traditional taxi / ride-hailing** services with time and distance-based pricing along with fixed fees to support tolls and airport fees.
- **Scheduled rides** for airport drop off and other scheduled use cases.
- **Chauffeured services** with time-based packages for weddings, parties and executive travel.
- **Campus rides** for universities and corporations, requesting rides from apps or kiosks.
- **B2B Portal.** Dedicated portal for your corporate customers or hotel concierge allowing them to create and pay for rides.
- **Multi-service.** The same fleet of vehicles can be used for both carsharing and ridesharing to maximize vehicle utilization as demand for each mode varies through the day.
